IMI's **Inkjet Age of Materials Conference 2018** addresses the challenges, options, and opportunities associated with future inkjet materials requirements, technology choices, drivers & barriers, and other issues required to effectively implement inkjet ink and fluids technologies for applications expansion and diversification. This strategic conference for the inkjet industry provides high value information on innovations, trends, and issues for senior executives, commercial managers, development teams, end users, and others looking to expand their knowledge and understanding of materials developments, products, and technologies shaping the future of inkjet as well as exchanging ideas with industry experts and peers.

TRS Consulting was initially formed by John Cooper in 1982 as Toner Research Services, and for over 20 years operated as a contract research laboratory specializing in imaging materials and their raw material components. TRS Consulting now provides limited material and IP consulting as well as providing a monthly technical information service (35 years) **Toner and Jet Ink Chemical News**.

Toner and Jet Ink Chemical News provides toner and jet ink scientists and professionals with convenient, inexpensive, and thorough patent and technical information services. It is a monthly technical information service designed both for producers of toners and jet inks as well as suppliers of raw materials to those and related imaging industries. The service's primary focus is a compilation, examination, and summary of each U.S. toner and jet ink related material patent and patent application published during the previous month. The newsletter also contains news items related to business and industry developments, new product introductions, a comprehensive meetings calendar, occasional guest articles, and a supplier guide. The newsletter is provided in electronic form for the reasonable price of \$495 annually (no extra charge for multiple recipients at a company location).

SPECIAL OFFER: TRS Consulting is offering any nonsubscriber registrants to IMI's **Inkjet Age of Materials Conference 2018** a complimentary subscription to **Toner and Jet Ink Chemical News** for the remainder of 2018.

Contact John@tonerandinkinfo.com for subscription information, a sample issue, or with any questions.

companies to learn, network, and develop a comprehensive understanding of current as well as future developments impacting successful product implementations, market entry/expansion, and technology utilization. Since 1990, IMI has held over 600 programs attended by well over 25,000 technical, marketing and management personnel from companies around the world.

IMI programs are designed to enable attendees to obtain the latest technical, market and application information while allowing time to network with other attendees in a time and cost efficient manner. Attendance at an IMI program enables attendees to meet with an industry's leading experts in a single location over a short period of time thus maximizing information transfer efficiency and minimizing travel and time expenses.
